# Missoula County

Located in western Montana, Missoula County is Montana's second most populous with 78,687 residents, according to the 1990 Census.

According to the *Montana Almanac*, by authors Andrea Merrill and Judy Jacobson, the county was established in 1865 and was once part of Washington Territory.

Missoula, the county seat, is the state's third largest city with a population of 42,918. Nicknamed the "Garden City," Missoula often has a milder climate than other Montana cities. Missoula is home to the University of Montana and the 1996 NCAA Championship Grizzly football team. The city is also a major medical and retail hub in western Montana.

According to the U.S. Bureau of the Census, median income for Missoula County households in 1989 was \$23,388. The county is 2,618.4 square miles in area; 2,598.2 square miles in land area and 20.17 in inland water area.

County residents experience the four distinct seasons. Average normal monthly temperatures, for example in Missoula, range from an average high of 28.0 degrees above in January to 85 above in July. The *Montana Almanac* shows the annual average precipitation in Missoula in 1995 was 16.22 inches and the length of growing season 117 days.

PLEASE NOTE: Because of time and budget constraints, we are only able to update our county flyers periodically. Individual tables are updated on a more frequent basis. You can call us if you'd like the most current information for a particular county. The Annual Averages for County Employment by Industry are updated annually, usually in June. The Top Employers are updated annually. Per Capita Income statewide is usually released late spring and county data around August each year. Population data for Montana is usually released in March and county data may be released at a different time. The Annual Average Labor Force information is benchmarked annually and numbers available before March. The other tables contain Census information and will be updated every 10 years.
